

MICROSOFT CLOUD ARCHITECT

If you're an experienced Microsoft Cloud Architect looking for an opportunity to use your visionary thinking and inquisitive mind to create innovative ways of helping customers meet their business needs, then this could be just the opportunity for you.

We're looking for someone who is:

Great with people and can:

- Support and coach customer IT teams by running cloud architecture workshops, helping customers develop their cloud strategy and understand the technologies that will help them meet their business needs
- Work with our customers to design and implement cloud based solutions with Microsoft Azure and System Centre
- Deliver performance tuning advice and guidance on the Microsoft virtualisation platform
- Develop automation to support self-service capabilities for on premises and hybrid solutions
- Liaise with clients on scoping requirements, design/planning, solution architecture, configuration and deployment
- Deliver health check engagements to identify areas for improvement within existing IT solutions
- Provide advice and technical expertise on complex and often challenging transformation projects
- Build and maintain strong client relationships and uphold our exceptional level of customer satisfaction
- Travel to customer sites across the UK with some overnights away

Intelligent and enthusiastic and has:

- Been working on Cloud transition projects including design, implementation and enablement
- An inquisitive mind with a desire to innovate and work with clients on complex projects
- Excellent written and verbal communication skills in English
- An inquisitive mind and a desire to innovate and work with clients on complicated projects

Specifically, you'll have:

- A deep understanding of MS Azure, IaaS and PaaS services
- Experience of Automation and Scripting knowledge with PowerShell, Json, or C#
- Engaging presentation skills with confidence in facilitating and delivering technical workshops
- A commitment to continual learning to keep yourself at the forefront of technology
- Experience of drafting requirements documents and technical specifications
- Excellent attention to detail and great written skills in English

The details:

Salary range: Up to £80,000 including a £6k car allowance, plus valuable benefits and discretionary bonus.

Location: Covering the South East of England and across the UK. We're based near Reading but you don't have to be.

You must be eligible to live and work in the UK without sponsorship.

An up to date CV tailored to this role is great but so too is a cover letter telling us the things your CV can't; that's about you and why this is your ideal role.
