

Configuration Optimisation as a Service (COaaS)

Ensure your SQL Server platforms are highly optimised, performant and secure

Overcome challenges with your data estate and make your SQL Server platforms work harder for you with our Configuration Optimisation as a Service (COaaS) Health Check

Ensure Optimal Configuration

The service runs regularly scheduled best-practice healthchecks on SQL Server platforms; analysing environments to ensure optimal configuration, maintenance, performance and security settings are applied.

Following the Health Check, our team will be on hand to discuss our findings and make recommendations for your data estate.

My Coeo Portal

You will be able to view the results of COaaS Health Checks in the My Coeo Portal, which displays any changes needed in terms of urgency, importance and service impact. Recommendations will also be discussed with our experts, allowing you to drill down into the details with our team.

Unlimited Instances

You can opt to include an unlimited number of SQL Server instances - on a monthly, quarterly or annual basis - for a fixed fee. This allows you to ensure that best-practice configuration is continuously reviewed and implemented across your entire estate.

Why Coeo?

Coeo partners with businesses to improve their decision-making and resilience through the effective use of data. Together we work to predict your company's future, so that you can make better decisions today.

Our Microsoft analytics and data platform specialists have vast experience of working with clients across their entire data journey – from modernisation and migration to artificial intelligence and beyond.

Coeo became the first Microsoft Partner globally to be awarded with the prestigious Analytics on Azure Advanced Specialization. We also hold the Windows Server and SQL Server Migration to Azure Advanced Specialization and Microsoft Gold Partner status, so you can rest assured that your data estate will be in a safe pair of hands.
