

Ready to Upgrade your Analytics with Next-Gen Technology?

Discover Microsoft Fabric in just 5 Days

Microsoft Fabric is a unique unified analytics powerhouse designed to serve organisations across all industries. It seamlessly integrates data movement, data science, Real-Time Analytics and business intelligence into a single robust SaaS solution. By consolidating data lake management, data engineering, and data integration Microsoft Fabric provides a comprehensive suite of services that streamline and enhance your data capabilities.

Is Microsoft Fabric the right fit for your organisation? Join us for a 5-Day Proof of Concept to discover its potential and explore how it can transform your data strategy quickly and effectively.

Key Outcomes:

Deploy Microsoft Fabric

Whether continuing a trial or deploying from scratch, our experts will tailor a new Microsoft Fabric Lakehouse architecture just for you.

Ingest & Model Data

We'll Ingest and model a structured data source to build a semantic model that meets your specific needs.

Measure Success

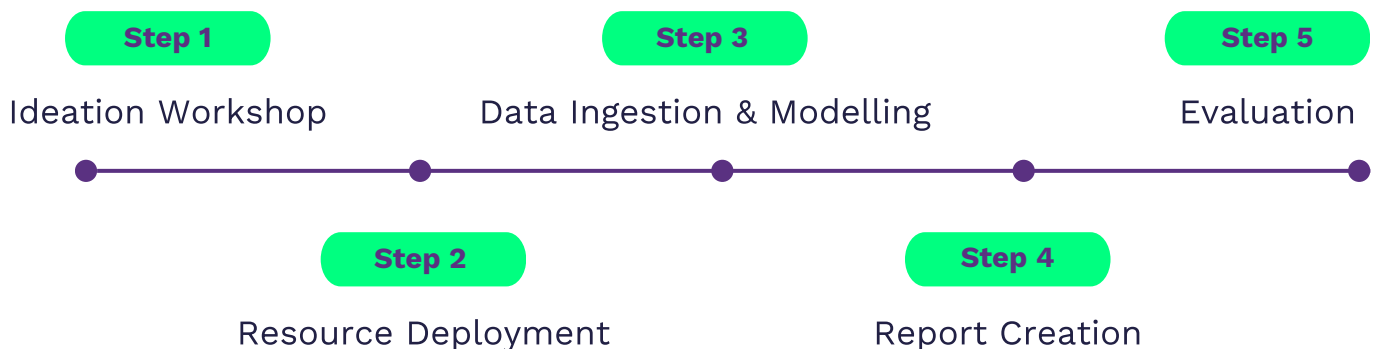

Test, assess and evaluate Fabric's features and capabilities using your own data, guided by a Coeo consultant.

Working with our Solution Architects empowers you to quickly grasp Microsoft Fabric's capabilities and helps you explore relevant use-cases for this innovative solution.

What's included in our 5-day POC?

- **A Proof of Concept solution** in Fabric with ingested and modelled data, reusable notebooks, a semantic model, shortcut features and a report.
- **Access to our data experts** to evaluate Fabric's fit for your specific use cases.
- **At-a-glance insight** with a detailed Power BI report on your data in Fabric.
- **Guidance and next-step** recommendations on integrating and evolving the Microsoft Fabric platform.
- **Findings and success metrics** will be shared in a detailed playback presentation to key stakeholders.

Future-Proofing Your Analytics Platform Begins With our Microsoft Fabric POC. Our Service Can Help You:

Get Ready For AI

Fabric is fully integrated with AI, providing a solid foundation to accelerate your AI initiatives.

Deliver Business Insight

Quickly create reports, directly from your data sources & collaborate with instant visualisation tools with Copilot.

Improve Your Data Culture

With Fabric, your team - from data scientists to engineers and end users - shares access to a single version of the truth.

Evaluate Success & Plan Next Steps

Assess features, functionality, and overall platform capability against your organisation's data ambitions.
