

Make Microsoft Fabric Work for Your Business

Custom Deployment, Aligned To Your Goals And Data

Microsoft Fabric brings all your data together in one platform, making it easier to access insights and support faster, better decisions. Coeo will design and build a solution around your goals, creating the pipelines, models and reports your teams need to get value from day one. We focus on getting the right structure, governance and security in place, so your platform is reliable, scalable and ready for what's next.

What's Included?

Discovery and Design

We work with your teams to understand your requirements and design a solution architecture that fits your goals, timeline and budget.

Build and Deploy

We implement your Fabric solution, including data pipelines, governance, modelling and reporting. ensuring it's secure and scalable.

Test and Refine

We validate the solution with your data and users, making improvements based on feedback.

Launch and Support

We deliver training, documentation and go-live support, so your teams are confident and self-sufficient.

Why Work With Us?

As a Microsoft exclusive Solutions Partner for Data & AI, we bring hands-on experience delivering Microsoft Fabric across industries including finance, retail and public sector. We'll work as an extension of your team, bringing clarity, pace and technical depth to your project.
