

Migrate Your Power BI Premium Environment to Microsoft Fabric

With the release of Microsoft Fabric and the Fabric Capacity SKUs, Microsoft announced the retirement of the Power BI Premium Per Capacity SKUs. From 1st January 2025 you'll need to replace your Power BI Premium capacity subscription with a Fabric capacity at renewal.

We have designed a migration service to transition your Power BI Premium environment to Microsoft Fabric, ensuring minimal disruption and maximum efficiency. Our team of experts will guide you through every step of the process, applying best practice and advanced tools to deliver a smooth and successful migration.

Key Outcomes:

Enhanced Capabilities

Recommendations on how to take advantage of Microsoft Fabric's advanced features and improved performance

Cost Efficiency

Reduce costs by optimising resource usage and taking advantage of Microsoft Fabric's scalable infrastructure

Future Proofing

Position your organisation for future growth and innovation by adopting a modern, scalable, and flexible data platform

What's Included?

Initial Assessment

A thorough analysis and catalogue of datasets, reports, and dashboards in your current Power BI Premium Environment.

Migration Strategy

Develop a customised migration plan tailored to your specific needs and goals.

Risk Assessment

Identify potential risks and create migration strategies to ensure a smooth transition.

Seamless Transition

Expert led migration process with a focus on minimal disruption to your business operations.

Migration Steps

Our team will work with you to:

- Create a new Microsoft Fabric Capacity (If required).
- Reassign existing workspaces to your new Fabric capacity.
- Re-run all required active jobs.
- Recommend a tailored transformation path that will make the most of the additional features of Microsoft Fabric.
- Provide comprehensive knowledge transfer for you and your team to get familiarity with your new Microsoft Fabric environment.

Managed Analytics

Our Managed Service team can continue to support you after the migration monitoring your analytics environment around the clock to proactively resolve issues, minimise downtime and ensure everything runs smoothly.

Contact our team to schedule a quick chat about our Power BI to Fabric migration and start your journey towards a high-performing, secure, and trusted business intelligence platform.
