

SQL Server Migration to Azure

Move Your Data Platform To The Cloud With Confidence

Migrating your SQL Server environment to Azure can improve performance, reduce costs and make your platform easier to manage. We'll help you make the move in a way that's secure, structured and aligned to your business goals. If you're modernising an ageing platform or planning ahead for growth, our team will deliver a migration that's low risk and built to last.

What's Included?

Discovery and Design

We review your current environment and create a clear migration plan based on performance, dependencies and business needs.

Platform Design

We recommend the right Azure services, taking into account cost, scalability, availability and security.

Migration Delivery

We migrate your workloads in a way that minimises disruption, using 18 years of experience and best practice to keep things smooth and predictable.

Launch and Support

We provide go-live support, documentation and advice to help you make the most of your new platform.

Why Work With Us?

As a Microsoft exclusive Solutions Partner for Data & AI, we bring hands-on experience delivering Microsoft Fabric across industries including finance, retail and public sector. We'll work as an extension of your team, bringing clarity, pace and technical depth to your project.
