

# AI Incubator

## A practical framework to accelerate AI delivery

Many organisations have AI ambitions but struggle to move beyond pilots. Our AI Incubator provides a structured framework to enable enterprises to scale their AI capabilities, from identifying use cases, establishing a robust infrastructure framework and operationalising AI to drive business transformation. Using proven strategies and frameworks, we will help drive AI adoption and implementation using cutting-edge technology and best practices.

The service is comprised of three stages:

### Enablement

Prioritise the right use cases

Identify and score high-value AI opportunities using an AI patterns scorecard, so you focus investment on the use cases that will deliver measurable outcomes.

### Foundation

Build an AI-ready platform

Build the technical foundations, including landing zone design, governance, and security, so your AI solutions are scalable, secure, and aligned with enterprise standards.

### Operate

Scale from pilot to production

Move beyond isolated proofs of concept with a repeatable delivery and GenAIOps model, enabling ongoing deployment, improvement, and operational oversight.

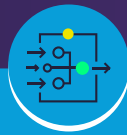

Across the three stages, we work with you to bring people and process together, evaluating and prioritising use cases, establishing the AI foundation architecture and implementing GenAIOps to deliver AI solutions at scale. The outcome is a clear roadmap, agreed technical foundations, and a repeatable delivery approach that supports ongoing deployment and improvement.

## What's Included?

### Enablement

- AI readiness and kick-off session
- Use case discovery workshop
- Use case scoring and prioritisation
- High-level solution outline
- Rapid prototype for one priority use case

### Foundation

- Architecture and platform design session
- Governance and security guardrails
- Data and integration approach
- Foundation build plan and next steps
- Build support for key components

### Operate

- Plan to move AI into production
- Proof of Value scope and success measures
- Proof of Value delivery (6–8 weeks)
- Deployment and operational handover
- Repeatable approach to scale delivery

## Who's it for?

The AI Incubator can meet you anywhere on your AI adoption journey. Whether you're exploring your first use cases, trying to prioritise the right opportunities, looking to scale beyond pilots, or improving how AI is managed in production, we provide a structured framework with clear outputs at each stage.

## Why Choose us?

### Speed to Value

Our AI team has the skills and experience to help you quickly create a practical solution that delivers real value, getting you to results faster.

### Collaboration

Our specialists will work with you every step of the way to design and implement a solution that meets your needs and delivers impactful results.

### Business Benefits

Measure accurate ROI from your AI initiatives, whether it's cost or efficiency gains or enhanced customer engagement.

### Future Ready

We'll help you create AI practices that grow with your needs and ensure responsible, ethical use of AI.
