

Managed Databases

Enterprise-Grade Cosmos DB Managed Service

Azure Cosmos DB is a powerful, globally distributed database platform, but running it reliably in production requires ongoing operational expertise. As part of our Managed Databases service, Coeo provides end-to-end operational support for Cosmos DB, delivered in the same proven way we support SQL Server and other business-critical data platforms.

What we Support

- Cosmos DB (Core SQL API, MongoDB API)
- Databases, containers, and throughput scaling (RU/s)
- Indexing, partitioning and query optimisation
- Geo-replication and failover strategies
- Backup, restore, and data protection
- Security, access control, and governance
- Performance monitoring and cost optimisation

How we Support you

Manage and Run

- Proactive monitoring and intelligent alerting
- Incident, problem, and root-cause management
- Change support and ongoing platform maintenance
- Access to Engineers with deep CosmosDB expertise and Premium Microsoft Support escalation
- Networking and private connectivity management

Enhance & Optimise

- Regular best-practice reviews
- Upgrade and feature lifecycle management
- Change feed integration enablement
- Quota and capacity monitoring
- Synapse / Fabric mirroring support
- ...and more, depending on your environment

What this Delivers

- Reduced risk of unplanned outages or performance issues
- Consistent, proactive management of your Cosmos DB platform
- Faster resolution of incidents by experienced data engineers
- Optimised performance and predictable running costs
- Ongoing best-practice alignment as your platform and Azure evolve
- Confidence without increasing internal headcount

With the right operational support, Azure Cosmos DB becomes a dependable, scalable foundation for business-critical applications. Coeo's Managed Databases service ensures Cosmos DB is monitored, maintained, and continually optimised, giving organisations confidence that performance, resilience, and cost are being actively managed as their platform evolves.

Why Choose us?

We are a trusted Microsoft Data and AI partner. Our Microsoft data platform and analytics specialists have vast experience of working with clients across their entire data journey, from modernisation and migration to artificial intelligence and beyond.

Microsoft Exclusive Expertise

Our teams are specialists across Microsoft data platforms, with hands on experience supporting Azure native and hybrid database environments.

Built for Business Critical

Our engineers operate complex, high availability data platforms everyday, supporting workloads that can't afford downtime.

Proactive, Service-Led Delivery

Our teams focus on prevention and continuous improvement, not just reacting to tickets when something breaks

Proven at Scale

Our managed service team is the backbone of our business, with extensive experience running and optimising databases at scale.
